

### **Amendments to the Claims**

Claims 1, 2, 4, 5 and 7 remain in this application as the result of an earlier restriction requirement.

### **Listing of Claims:**

Claim 1 (original) An axon growth stimulation kit comprising  
a first container means for containing a flowable carrier component or two or more separate components capable once intermingled of forming a flowable carrier component, said flowable carrier components each being capable of forming a therapeutically acceptable matrix in vivo at a nerve lesion site and  
a second container means for containing a therapeutically active agent for facilitating axon growth at the lesion site  
wherein said therapeutically active agent is releasable from said in vivo matrix into the adjacent external environment.

Claim 2 (original) An axon growth stimulation kit as defined in claim 1 comprising  
means for dispersing the therapeutically active agent in said flowable carrier component so as to form a flowable axon growth stimulation composition  
and  
means for delivering the flowable axon growth stimulation composition to the lesion site.

Claim 3 (withdrawn)

Claim 4 (original) An axon growth stimulation kit as defined in claim 1 wherein said therapeutically acceptable matrix is a fibrin matrix.

Claim 5 (original) A biocompatible composition comprising: (i) at least one supplement selected from the group consisting of therapeutically active agents for facilitating axon growth; and (ii) a flowable carrier component capable of forming a therapeutically

acceptable matrix in vivo at a nerve lesion site; wherein said supplement is releasable from said matrix into the adjacent external environment.

Claim 6 (withdrawn)

Claim 7 (original) A biocompatible composition as defined in claim 5 wherein said therapeutically acceptable matrix is a fibrin matrix.

Claims 8 to 10 (withdrawn)
